

POS
SOLUTIONS

Introducing

An easy to use, feature rich restaurant management system of the future.

is your all-in-one solution that provides you with the most complete package of features to help simplify the running of your business. Our digital menus presented on the iPad® are easy to customize and seamlessly integrate with our POS system and smart phone app. Includes FREE mobile ordertaking and payment app.

A cloud-based solution, offering remote access to feel the pulse of each operation regardless of physical location.

INCREASE YOUR BOTTOM LINE

Reduced Labor Costs

Servers can serve rather than take orders and process payments, allowing them to handle twice as many tables.

Increase Retention Rate

Customers are more likely to fill out surveys and provide feedback using our digital menus. This gives you the info needed to make the necessary adjustments to keep them coming back.

Improved Menu Management

Save money by not having to reprint menus every time you change an item or price. Easily update your menu in a matter of seconds and avoid those tacky looking write overs.

Increase Sales

Consumers will order an average of 20% more with enticing, high resolution images that trigger emotional and psychological responses

Digital Menus

Take your restaurant to the next level with our fully customizable self-ordering menus. Customers can place orders directly, request a server's attention, view nutritional info, send special instructions to the chef, and pay electronically without the hassle of flagging down a server.

PRODUCT FEATURES

BESIDES ALL THE STANDARD COMPONENTS WE OFFER:

- Wireless Terminal,
- Pay at the table/take orders at the table,
- EMV certified payment with post tip adjustment,
- Digital menus,
- Fully integrated Self order/Self pay kiosk,
- Wireless KDS,
- Inventory,
- Integrated Gift card solution.

MOBILE POS Solution

PRIMARY DESIGNED FOR IPHONE AND IPOD.

Mobile POS packs all functionality that you will ever need in a neat and easy to use interface. It can be used for a simple payment acceptance, delivery, reporting, inventory to build an order and even record your customer details for future use

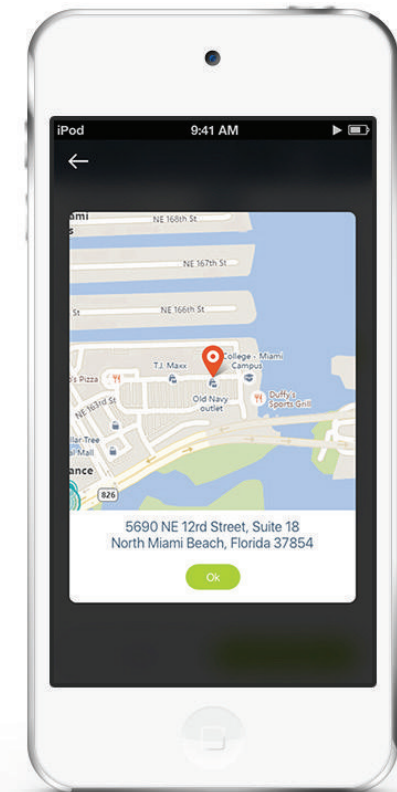

Ability to accept payments at the table

Accept payments remotely

Available on all Apple devices

KIOSK

Aptito kiosk fully integrates with POS. Any orders can be routed and tracked through iPad POS system or can be sent directly to the kitchen. With our Kitchen display orders can be send remotely from any location directly to your Kitchen!

Why Kiosks:

- Increase Sales - Eye-catching displays of your menu attract more foot traffic & facilitate more orders.
- Easy-to-use digital iPad menu software can be setup quickly and updated in real-time as well as accept payments from the table
- Save time & money - Customers can order and tender payments directly from kiosk or menu.

STEP 1 – REGISTER - Sign up at [redacted] & complete the registration form

STEP 2 – CUSTOMIZE - Log in to design your menu & floor plan

STEP 3 – INSTALL - Download POS on your iPad®

OUR PHILOSOPHY IS... “WE’RE IN THIS TOGETHER”

Our feedback and suggestion system is built directly into the POS system and at your fingertips to ensure evolves alongside your business for years to come.

RELIABILITY YOU CAN COUNT ON

local server is a reliable tool for the offline mode, in case your internet connection is down. You will never lose a customer and sale proceeds as both local and cloud servers are synchronized as a double backup.

BUSINESS TOOLS TO SIMPLIFY LIFE

Our comprehensive reporting, payroll & inventory systems are fully customizable, exportable and allow you to exchange & combine multiple location data.
